

# ENVIRONMENTAL POLICY

THE OBJECTIVE OF THE WHOLE ALPHA INNOVATIONS AND ITS MANAGEMENT TEAM IS, BEYOND THE STRICT COMPLIANCE WITH ALL NATIONAL AND INTERNATIONAL REGULATIONS, TO CONTINUOUSLY REDUCE ITS IMPACT ON THE ENVIRONMENT.

ALPHA INNOVATIONS COMMUNICATES TO ALL ITS STAFF THE DIFFERENT ELEMENTS AND ADVANCES IN TERMS OF ENVIRONMENTAL POLICY. MANAGEMENT SUPPORTS THIS ENVIRONMENTAL POLICY BY ENSURING THAT THE RESOURCES NECESSARY FOR ITS PROPER APPLICATION ARE AVAILABLE AND ENCOURAGES EVERY TEAM MEMBER TO APPLY THEM.

OUR COMPANY IS PARTICULARLY INTERESTED IN ENERGY AND FUEL SAVINGS, REDUCING RELEASES INTO THE ATMOSPHERE AND REDUCING PACKAGING AND WASTE. WE ARE CONSTANTLY WORKING TO REDUCE ENERGY CONSUMPTION. OUR CARBON FOOTPRINT SHOULD BE CALCULATED BEGINNING OF 2022.

ALPHA INNOVATIONS SA IS AWARE THAT THE SUBCONTRACTING OF A SIGNIFICANT PART OF ITS PRODUCTION IN CHINA HAS A SIGNIFICANT IMPACT ON ITS CARBON FOOTPRINT. SINCE ITS CONSTITUTION, ALPHA HAS COMMITTED TO:

- ✓ Identify the significant environmental impacts linked to its activities, products and services, and set KPIs in order to monitor compliance with environmental impact reduction objectives ;
- ✓ Involve their entire team, suppliers, partners and subcontractors in the environmental aspects of their activities and encourage their awareness of their impacts;
- ✓ Review its flows with the aim of reducing its overall impact in terms of emissions negatively impacting the climate, in particular by taking action to relocate its production;
- ✓ Work in accordance with the legal provisions applicable to its activities, opting in any situation for the option that will have the lowest impact on the environment;
- ✓ Improve its environmental performance by achieving increasingly ambitious objectives, by developing innovative solutions on its own and by staying at the state of the art of the most innovative technologies in terms of energy performance and reduction of environmental impact;
- ✓ Be an actor in dialogue with regional and national public authorities through the federation of technology companies in particular ;
- ✓ Be an ambassador of innovative technologies to network managers and energy suppliers, by participating in renewable energy communities;
- ✓ Listening to any suggestion and encouraging any initiative from its staff or the group in the implementation of solutions improving its impact on the environment;
- ✓ Always favor repairs over the sale of new products, and the purchase of recent second-hand products with technical characteristics equivalent to new ones.
